

Digital Serigraphic Technologies A/S
a Bjørn Thorsen A/S company

DST offers a broad portfolio of products for digital heat transfer printing on a variety of substrates in multiple applications, like professional sportswear.

Getting more from the new DST

- Digital Serigraphic Technologies A/S (DST A/S) is a majority-owned affiliate of the Bjørn Thorsen group, launched in March 2020
- Anchored on a proven technology and know-how, commercial globally for many years
- The DST portfolio for the heat transfer industry includes release liners, inks, adhesives and special additives
- DST products are designed to work with HP Indigo, Ricoh, Oki and Xeikon
- Our mission is to provide high quality, flexibility and unique durability for digital heat transfers

Taking digital printing to higher levels

Heat transfer labels

Soft touch

Flexibility

Excellent washability

Durability

APPLICATIONS

High quality sportswear

where soft touch, stretchability and washing temperatures of 60°C/140°F are essential

Fashion industry

where special, colorful images are imperative

Work clothing

where washing temperatures of 90°C/194°F and wearability are required

Everyday wear garments (t-shirts, caps, vests, etc.)

where soft touch, stretchability, washing temperatures of 60°C/140°F and high quality

Totes and shopping bags (paper, cotton, polypropylene, polyester, jute, etc.)

where high quality logos/images for promotional purposes are necessary

Sports accessories

where high durability is needed

PRODUCTS

Release liners

- Paper sheets
- PET foils

Inks

- White water-based inks
- Clear water-based inks
- Blocking water-based inks
- Silver inks

Adhesives

- Waterborne adhesives
- Plastisol-based adhesives
- Adhesive powders

Special additives

- Catalysts
- Retarders
- Viscosity modifiers
- Wetting agents
- Thinners & Thickeners
